

# COMMAND & CONTROL

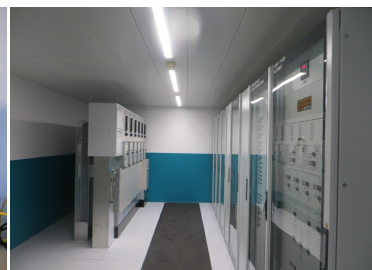

From water intake to energy production, HYDRO Exploitation integrates automation and information management systems using the latest technologies.

**ANALYSIS  
AND**

**LARGEHYDRO  
AUTOMATION**

**MV/LV  
ELECTRICITY**

## ADJUSTMENT OF ELECTRICAL PROTECTION EQUIPMENT

This service is able to adapt → protective

## & CONTROL

Hydroteck Control is a compact solution permitting the automatic and manual control of a small → hydroelectric unit

Medium voltage (MV) and low voltage (LV) electrical installations age over time and must be replaced before they → become faulty and cause major

## SMALL HYDRO AUTOMATION & CONTROL

The automation and control system of hydroelectric power stations combines human → machine interfaces (HMI)

## TELECOMMUNICATIONS

The remote transmission of information is necessary for a large number of hydropower plants. Especially in system control, where reliable and encrypted → remote transmission

## WASTEWATER MANAGEMENT AND TREATMENT

We offer services enabling remote operation of water intakes, electrical distribution management, → wastewater
