

OUR COMMITMENTS

We pay particular attention to the management of risks to people, the environment and property, related to major projects or day-to-day operations.

RISK MANAGEMENT

Today, we have a risk management process and

QUALITY MANAGEMENT

We have implemented an integrated

ENVIRONMENT

Since its foundation, HYDRO Exploitation has

powerful tools at our disposal to help us identify the risks associated with our activities. →

quality, environmental, health and safety management system. →

shown its willingness to accommodate facility management together with environmental →
